RF & Wireless Layout. Radio Frequency or RF designs are often infamous as "black magic". This belief exists because the fundamental mechanisms of how RF energy is developed within a printed circuit board is not well understood by many.

Electronic design automation (EDA), also referred to as electronic computer-aided design (ECAD), is a category of software tools for designing electronic systems such as integrated circuits and printed circuit boards. The tools work together in a design flow that chip designers use to design and analyze entire semiconductor chips. Since a modern semiconductor chip can have billions of ...
