Human resource management (HRM) has frequently been described as a concept with two distinct forms: soft and hard. The soft model emphasizes individuals and their self-direction and places commitment, trust, and self-regulated behaviour at the centre of any strategic approach to people. In contrast, the hard model stresses the rationalism of strategic fit and places emphasis on performance ...

In recent years, information technology has had a profound effect on human resources (HR) processes and practices. However, relatively little research has examined its effectiveness, and most of the existing studies have not assessed the degree to which these new systems enable organizations to reach their HR goals of attracting, motivating and retaining employees.
